

Your On Demand Medical Exam

Fulfilling the promise of telehealth

Tyto Care is transforming primary care by putting health in the hands of consumers. We seamlessly connect people to clinicians to provide the best remote examination and diagnosis solutions. Our mission is to delight consumers and clinicians alike by delivering easy, affordable and high quality telehealth visits, complete with medical exams, all from the comfort of home.

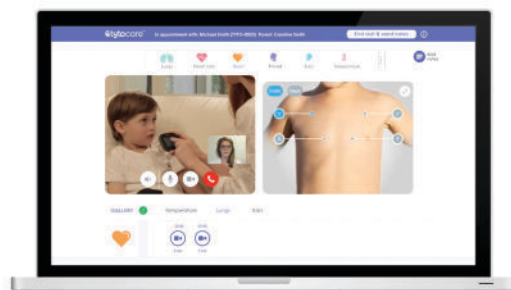

Tyto Care has three telehealth solutions: TytoHome™ for consumers, TytoPro™ for professionals, and TytoClinic™ for remote point-of-care locations such as schools, pharmacies, employer work sites and remote clinics. All solutions are designed to replicate a face-to-face clinician visit and include a hand-held modular examination tool for examining the heart, lungs, skin, throat, ears and body temperature, and a complete telehealth platform for sharing exam data, conducting live video exams and scheduling visits. Additional features include:

- A cloud-based data repository with analytics
- Open APIs for simple integration with EHR systems, telehealth platforms, and other examination tools (BP, SpO2, scales, etc.)
- Built-in guidance technology and machine learning algorithms to ensure accuracy and ease of use

Tyto Care was founded by Dedi Gilad, Ofer Tzadik and industry experts in 2012 and has received over \$47 million in funding from investors including Ping An, Walgreens, Cambia Health Solutions, OrbiMed, Fosun Pharma, and LionBird. Following its FDA clearance in late 2016, and the launch of its products in the United States in early 2017, Tyto Care has gained significant traction with major US health systems, telehealth companies, large private practices and employers.

TytoHome

TytoVisit™ Platform

A comprehensive medical exam and telehealth visit. Anytime. Anywhere.

- TytoCare extends the reach of clinicians and specialists to any remote location
- Self-guidance technology ensures anyone can use Tyto to capture and share exam data
- Portable, lightweight design makes it easy to take with you
- Exams can be forwarded for review, or conducted during a live video telehealth visit

- Provide access to quality care, 24/7
- Improve patient outcomes
- Improve patient satisfaction
- Reduce costs

- Reduce readmission rates
- Reduce unnecessary visits to the ER
- Improve continuity of care
- Reduce point-of-care clinician requirements
