

Telehealth Beyond Video

A Comprehensive Exam and Telehealth Visit Anytime. Anywhere.

 tyto care™

Fulfilling the Promise of Telehealth

TytoCare is connecting patients and clinicians like never before

Can clinicians reliably diagnose an ear infection, sore throat, or upper respiratory infection when their patients are miles away?

Now they can with TytoCare, a complete telehealth solution that provides a comprehensive telehealth visit with a physical exam, anytime and anywhere.

Heart Exam

Enables clinicians to hear and capture heart sounds

Heart Rate

Digitally records heart rate

Lung Exam

Enables clinicians to hear and diagnose whether it's a cold, asthma, bronchitis, or something more serious

Ear Exam

High-resolution images of the canal and tympanic membrane enable clinicians to diagnose ear infections

Skin Exam

High-resolution digital images of rashes,eczema, and other skin lesions inform dermatology diagnoses

Throat Exam

Tongue depressor attachment makes it easy to capture clear images of the tonsils to help clinicians diagnose infections

Temperature

Get an accurate temperature read with our no-touch infrared basal thermometer

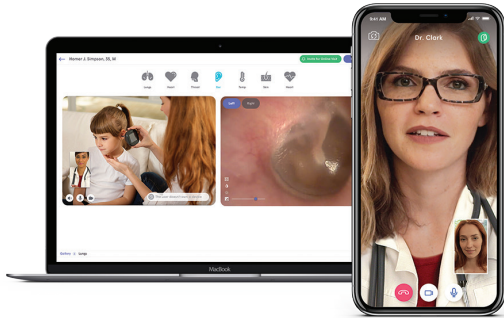

Abdominal Exam

Captures stomach and bowel sounds to help diagnose gastrointestinal issues

TytoVisit™

A complete telehealth platform

TytoVisit delivers the most comprehensive telehealth visit and physical exam available. Our HIPAA and GDPR-compliant cloud platform lets clinicians conduct live video remote examinations, review and share exam data, and schedule telehealth visits. All Tyto products use the TytoVisit platform, which includes:

- The TytoApp™ that provides a live telehealth exam or exam and forward for later review
- Open APIs for integration with EHR systems and existing telehealth platforms
- Patient scheduling, questionnaires, e-prescriptions and analytics

TytoPro™

Expand your reach beyond the clinic

Designed for professional-to-professional use, TytoPro helps them reach their specialists to home care, schools, and urgent care clinics. With TytoPro, clinicians can conduct a remote exam to obtain a second opinion or specialist consult. Includes:

- The TytoPro device with robust hardware to withstand the rigors of everyday office use
- A high-resolution digital camera, thermometer, otoscope, stethoscope (with volume, bell and diaphragm filters), and ear buds
- The TytoApp with professional workflow

TytoHome™

A check-up without the check-in

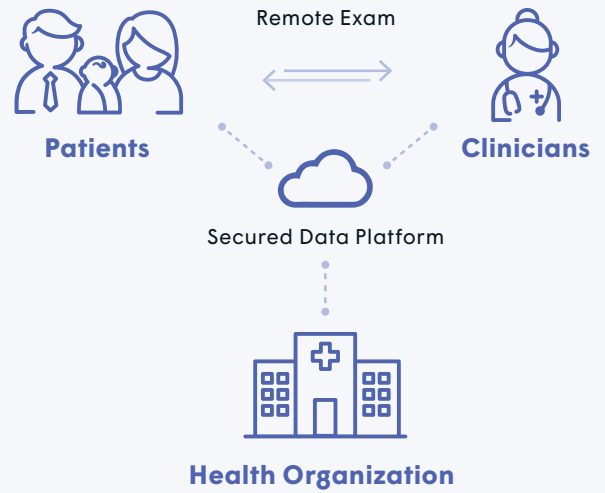

TytoHome lets patients perform a comprehensive exam at home and share results with a remote physician for a quick, convenient diagnosis. Proprietary guidance technology ensures patients can easily capture accurate exam results so they can be confident that the remote diagnosis is the right diagnosis. Includes:

- The TytoHome device and attachments for examining the ears, throat, lungs, heart, skin, and capturing heart rate and temperature
- The TytoApp for live video telehealth exams or “exam and forward”
- Travel case and rechargeable battery

How TytoCare Can Help
