**Quick, simple and safe!**

**The cutting tool S-CUT** is designed to quick, safe and efficient cut through various materials.

In emergency situations it is important to quickly remove clothes for assesment and to deploy livesaving efforts. S-CUT cuts both leather jackets, belts and safety belts with a single cut. This model is tailored for use by all kind of rescue teams and military. It is used all over the world.

The security principle of S-CUT builds on the patent technique that during several years has been used on corresponding tools intended to resque teams and military defence in large parts of the world. In many situations S-CUT completely replaces scissors, knives and other cutting tools.

- Suitable for both right- and lefthanded people.
- Can be used with thick gloves.
